PROFESSIONAL SUMMARY

Result-driven Full-Stack Software Engineer with 5+ years of professional experience designing, building, and optimizing scalable, high-performance web applications. Expert in TypeScript, Next.js, and Node.js ecosystems with a strong emphasis on clean architecture and performance optimization. Advanced practitioner in leveraging cutting-edge AI systems (Anthropic Claude, OpenAI Codex, GitHub Copilot) to accelerate delivery pipelines, automate complex end-to-end testing infrastructure, and optimize code modularity while maintaining rigorous software quality standards.

TECHNICAL SKILLS & AI COMPETENCIES

Languages:	JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3
Frontend Stack:	ReactJS, NextJS, TailwindCSS, TanStack Query, Redux Toolkit, MUI, ReactPDF, SignalR, React Hook Form, Vite, Webpack
Backend & Databases:	NodeJS, ExpressJS, Prisma, Drizzle, PostgreSQL, MongoDB
DevOps & Automation:	GitHub-Actions (CI/CD), DigitalOcean (Droplet, App Platform), Linux Administration, Nginx, Playwright Automation, Clerk Auth, End-to-End Testing,
AI Systems Mastery:	Anthropic Claude, OpenAI Codex, Google Gemini, GitHub Copilot, AI-Driven Prompt Engineering, Automated AI Code Refactoring

PROFESSIONAL EXPERIENCE

Sr. Frontend Engineer - Private HealthTech SaaS Company Minnesota, USA (Remote) | Oct 2023 - Present

- Spearheaded legacy modernization and architectural overhaul of an enterprise healthcare SaaS platform, engineering highly responsive clinical forms and real-time dashboards utilizing Next.js and TypeScript.
- Architected and executed robust end-to-end automated testing layers via Playwright, introducing automated regression test suites into the deployment pipeline that significantly elevated code coverage.
- Accelerated dynamic layout rendering and iterative code generation cycles by integration of advanced LLMs (Claude, Gemini) into development sprint loops, speeding up delivery timelines across product requirements.
- Collaborated actively in bi-weekly Agile/Scrum cycles, presenting functional product iterations and interactive software demos directly to executive stakeholders to align technical architecture with business milestones.

Backend Engineer - Valkyrie IT Ltd. Dhaka, Bangladesh (Remote) | Nov 2021 - Sep 2023

- Engineered scalable backend infrastructure, micro-services, and essential software features for a comprehensive, enterprise Human Resource Management (HRM) platform handling dense organizational logic.
- Designed and maintained robust RESTful APIs to cleanly process critical workflows, including secure employee data administration, live geolocated attendance logging, and automated monthly payroll calculation systems.
- Optimized complex relational database schemas, indexes, and queries using PostgreSQL and Prisma ORM, which substantially decreased database latency constraints and preserved strict transactional data consistency.

Frontend Engineer - Wikiance Kolkata, India (Remote) | Nov 2020 - Oct 2021

- Led frontend software development, optimization, and modular feature scaling of the company's flagship client-side resume builder web application, substantially boosting UI interactivity and user retention metrics.
- Refactored an asset-heavy tech blogging platform by integrating a structured headless Content Management System (CMS), enhancing production build speeds, SEO indexing capabilities, and system stability.
- Provided technical mentorship, comprehensive documentation, and structured code reviews to engineering interns on modern frontend workflows, state management best practices, and clean code paradigms.

EDUCATION

Govt. Azizul Haque College, Bogura	— Higher Secondary Certificate (HSC) in Science	Feb 2016 - Feb 2018
Bogura Zilla School, Bogura	— Secondary School Certificate (SSC) in Science	Feb 2008 - Feb 2016
